

ALUMINIUM PROFILE WRAPPING MACHINE

APAM 7000DH

TECHNICAL DETAILS

WRAPPING MACHINE

WRAPPING

Designed to facilitate the packaging of profiles before shipment, this machine offers features that ensure high efficiency and ease of use. The drum motor has a power of 1.5 kW, with an adjustable speed range of 0-200 rpm, controlled by a digital potentiometer.

Additionally, the 0.37 kW drive motor operates within a speed range of 0-30 m/min, allowing the profile wrapping speed to be adjusted through digital displays on the operator panel.

The packaging process is carried out with two packaging reels on a drum supported by nine bearings. The drum operates stably and quietly, with a braking motor enabling quick and safe stops. The device can package profiles and groups up to a maximum size of 270x220 mm, and it is capable of wrapping round profiles up to a diameter of 300 mm.

OUTFEED CONVEYOR

INFEED CONVEYOR

0-200 DRUM RPM
0-30 M/M FEED SPEED

WEIGHT & DIMENSIONS

WRAPPING MACHINE

Seri	Conveyor Dimension (Disassembled)			Machine Dimension			Power			Weight
	Widht	Lenght	Height	Widht	Lenght	Height	Volt	Phase	Total	
7000	395 mm	2.000 mm	850 mm	1.800 mm	1.350 mm	1.850 mm	400	3	1,87 KW	860 KG

PROFILE CAPACITY & BRUSH DIMENSIONS

WRAPPING MACHINE

Seri	Electric Motors		Packing Dimension & Type		Maks. Profile Capacity
	Drum	Drive	Dimension	Type	Standart
7000	1 x 1,5 kW 1500 d/d.	1 x 0,37 kW 1500 d/d.	İç: Ø75 Dış: Ø240 125 mm	Naylon - Kağıt	270 x 220 mm

Adjustable drum and feed speed via control panel

Coils designed for paper and nylon wrapping

Prevention of empty wrapping with a motorized brake

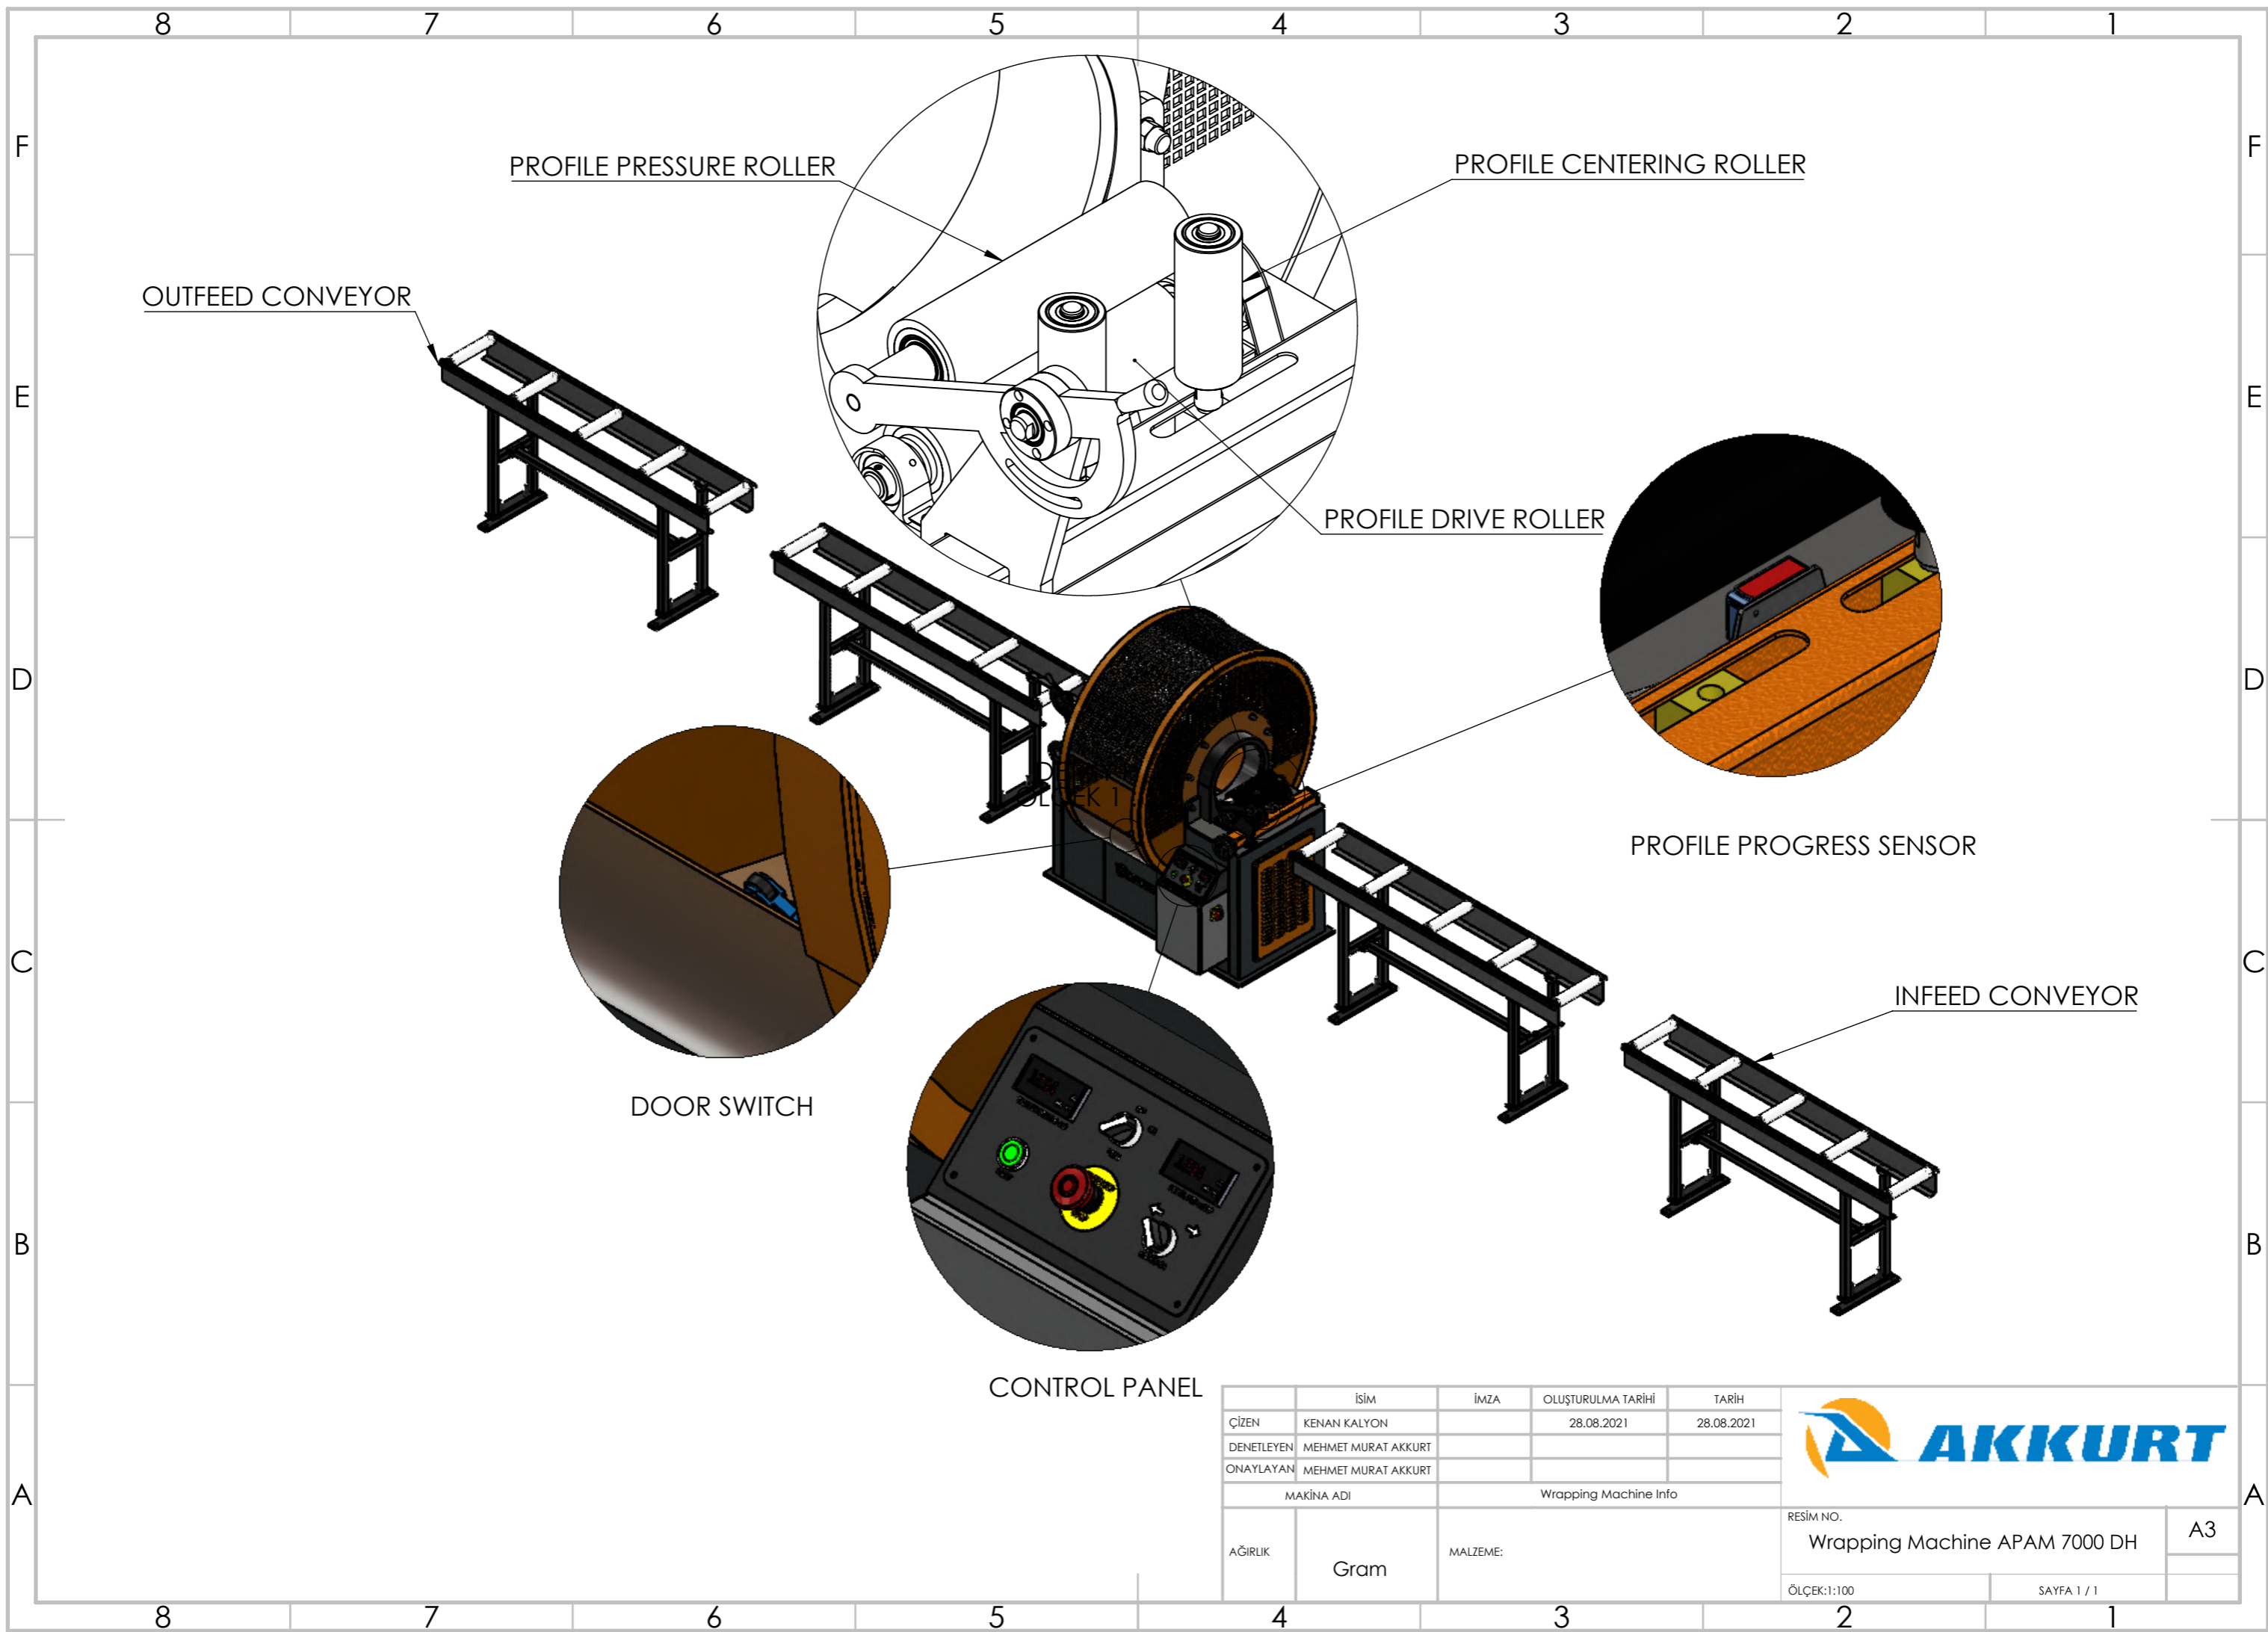

Inverter-controlled drum and drive motor

Safety switch cover

Profile feed control with sensor
